

Cisco Security Architecture Summit: For internal and partners to receive updates and roadmaps from the BUs on the solutions and technologies being developed.

## Firewall, Security Cloud Control & Secure Access: (Day 1)

### Hybrid Mesh Firewall:

- 2100 Series EOS (May 2025)
- Secure Firewall - Splunk integrations (October 2025)
- Universal ZTNA (hybrid) - Firewall +SSE policy (Private Preview – GA: October 2025)
- FTDv Support for Hyper-V (CY2025) - IBM Cloud: ASAv/FTDv/FMCv (CY2025)
- Cloud Protection Suite: 3rd Party Firewall Support (Future)
- New FMC Appliance Series: FMC1800, FMC2800 & FMC 4800 (April 2026)
- New Cisco Firewall Numbering: e.g. 10.0.0.0 (April 2026)

### Security Cloud Control:

- Integrations: Secure Workload (July 2025), Secure Access (Oct 2025),
- Central Provisioning and Administration / PIAM (March 2025)
- Centralized RBAC User and role mgmt. logs in SCC (GA)
- Identity Federation (Bring your own SAML): Customer can use own SAML instance (GA)
- Unified AI Assistant and Unified Troubleshooting. (March 2025)
- MSP Platform: high priority (Future)
- Upgrade planner for EOL Firewall devices (June 2025)

### Secure Access:

- Secure Access DNS Defense (same pricing as Umbrella DNS Security (May 6, 2025)
- DNS Security Migration tool (May 2025) in-place migration (June 2025)
- Umbrella SIG Migration tool (October 2026)
- Chrome Enterprise Browser (GA March 17)
- Remote Browser Isolation (RBI): integrated into Policy included (GA)
- DLP for Private Apps (files only) (GA March 30)
- CASB: Third-Party apps visibility + control (GA)
- Hybrid ZTNA Single Policy, Distributed Enforcement (Private Preview / Future)
- SIA via MASQUE: all ports & protocols via Zero Trust module (Future)
- Troubleshooting: Zero Trust PCAP, Speed test tool, Client diagnostic tool, etc. (Future)
- Integrations: SD-WAN, Meraki-BGP, MDM posture via Intune & JAMF, etc. (Future)

### Security Trials Console: (dashboard.ciscosecure.com)

- Integrations: Secure Workload, Multicloud Defense, many others. (2025)

## Secure Email: Bonus!

### Secure Email:

- Customer defined IP / Domain Allow & Block list (July 2025)
- Granular Inbound Policy & Control (July 2025)
- Outbound Mail Signing (July 2025)
- Outbound DLP: Secure Access Integration (July 2025)
- Azure Entra ID integration (July 2025)

## Identity Services Engine: (Day 2)

### Identity Services Engine: (cs.co/ise-roadmap)

- ISE 3.5 Open Beta: April-June 2025 (cs.co/ise-beta)
- New Context Visibility UI (v3.5)
- Multi-Factor Classification (MFC) Profiles (v3.5)
- TLS 1.3 Support for TACACS+ (v3.5)
- User & Device Authorization with Entra ID (v3.5)
- pxGrid Direct with OAuth/API Key Support (v3.5)
- Threat Centric NAC Tenable (v3.5)
- Profiler Features: New Classification engine, SNMP Endpoint Scanning (3.5)
- Improved Profiling Policy Management (3.5)
- Integrations: XDR & SCC (Future), Multicloud Defense (October 2026)
- Many more...

## Workload & Duo: (Day 3)

### Secure Workload:

- eBPF: Support for Linux, K8s and OpenShift (3.10 - GA)
- Scale 100K workload per cluster/tenant (4.0 Release – Q4CY25)
- Secure Workload Software only Appliance (4.0 Release – Q4CY25)
- Integration with ACI (4.0 Release - Q3CY25)
- Bring Your own Certificate (4.0 Release – Q4CY25)
- Integration with Isovalent using Tetragon agent (4.0 Release – Q4CY25)

### Duo & Identity:

- IAM: Complete Security-First Identity and Access Management solution (June 2025)
- User Identity: Custom user attributes & Support for inbound SCIM (GA)
- Identity Automation: Dynamic routing for external identity sources/onboarding (GA)
- Identity Automation: Outbound SCIM for automated provisioning (GA)
- Authenticate User: Password-only experience (GA)
- Passwordless: For embedded Browsers – supports WebAuthN (GA)
- Passwordless: 3rd Party IDPs – Leverage: LDAP, Entra ID, SAML 2.0 etc. (GA)
- Cookieless Passport (Private Preview - Q2, CY 2025)
- Trusted Browser: Shift Duo Desktop to Chrome Browser (Mac, WIN, Linux etc.) (GA)
- Microsoft Edge (for Business) Browser Trusted Connector (GA ~May 2025)
