

Cisco Security Architecture Summit: For internal and partners to receive updates and roadmaps from the BUs on the solutions and technologies being developed.

Network & Cloud Security: ¹ (Day 1)

Secure Firewall:

- Selective Traffic Decryption (FTD 7.7)
- Multicloud Defense Orchestrator (FTD 7.7)
- Local Configuration Changes (FTD 7.7)
- Geo Control for RAVPN (FTD 7.7)
- EVE based Selective Decryption and better visibility (FTD 7.7)
- Dynamic Offload trusted flows on 3100 and 4200 (FTD 7.7)
- AppID CPU Profiling to troubleshoot performance issues (FTD 7.7)
- Virtual Firewall on Nvidia Bluefield DPU (FTD 7.8)
- Hybrid Zero Trust Network Access (ZTNA) (FTD 7.8)
- AIOps Tools: use Generative AI to simplify firewall management (FTD 7.7+)
- Many more...

Secure Workload:

- Agent and Agentless Segmentation. (v3.10)
 - Threat based segmentation, eBPF support for Ubuntu, Legacy OS support, etc.
- Platform for scale and speed. (v3.10)
 - Cloud Connector Enhancement, Backup/restore existing rules, etc.
- Integrations (v3.10)
 - Azure and On-prem AD, Vulnerability Management, Security Cloud Control (SCC)

SASE: ¹ (Day 2)

Secure Access:

- Multi-Org: Shared User roles - Console v1 (Dec 2024)
- Identity: Multiple IdP Support for ZTA & SWG, OIDC Support (Dec 2024)
- Reporting: Enhanced Posture details per Event, Enhanced ZTA reporting (fqdn, etc.)
- ZTA: Clientless RDP & SSH, CNAME Support (Custom Domains), Posture (Dec 2024) (e.g. Qualys, Forcepoint, MS Defender), Android Support
- Platform: Container based resource connectors, Enable resources with CGNAT address
- Security: Private Resource DLP & File Inspection, ICAP support for DLP (Dec 2024)
- Optimized ZTA Routing (July 2025)
- Enterprise Privacy (per - app routing) (July 2025)
- Security Cloud Control (SCC) Managed (July 2025)

Meraki - Secure Connect:

- Full-service footprint: India, South Africa (Fall CY24)
- Assurance: Service status in Dashboard (Fall CY24)
- Unified Policy: Org wide group policy management across MX FW (Early CY25)
- IPSec Sites: Experience, Performance + BGP (Early CY25)
- Assurance: ThousandEyes Integration for Remote User Experience Monitoring (CY25)
- Many more...

Identity & Access: ¹ (Day 3)

Duo:

- Support for multiple SAML Auth sources or multiple AD sources (Public Preview)
 - MS Entra ID, AWS, Ping Identity, IdP of Choice, JumpCloud, Okta Auth0, Google
- Directory Integrations (coming soon)
 - Inbound SCIM with Okta, Google Directory Sync, Admin syncs, etc.

Duo - Cisco Identity Intelligence (CII):

- New Reports Section: Nightly reports. Download latest or go back historically (GA)
- Easy Button for Integration Data (GA)
- XDR Automation: e.g. Webhooks, CII to send to XDR (GA)
- On-prem: MSFT AD (Jan 2025), FTD (Apr 2025), 3rd Party Directories (Ping) (GA)

Identity Services Engine (ISE):

- ISE Integration Catalog: Native App Integration Store (v3.4 P1)
- Classifying Cloud Workloads (v3.4 P1)
- ISE with Cisco Duo for VPN & Device Administration (3.3.1+)
- Many more... (ISE Roadmap: <https://cs.co/selling-ise>)

Security Cloud Control (SCC):

- Integrations: Secure Firewall, Multicloud Defense, Secure Workload, Hypershield, Secure Access. (Early 2025)

Security Operations: ¹ (Day 4)

XDR:

- Adversary Radar Chart (Jan 2025)
- Secure Endpoint Policy Coverage Mapping (Jan 2025)
- EVE Detections in XDR (July 2025)
- SOC Observability Dashboard (July 2025) | Many more...
- Integrations for Analysis: Umbrella, PAN NGFW, Checkpoint, Cortex XDR, etc. (Jan 2025)

Secure Endpoint:

- Host firewall management: Enhance response capabilities with EDR (GA)
- Secure Client: Adding Secure Endpoint on Cloud Management Model for Mac (Future)
- MITRE ATT&CK: Dynamic mapping for the Secure Endpoint coverage (Future)
